WILL CLOSE DOWN POWER

STATION AT WATERFORD Soon after January 1, the electric power station in Waterford, originally used by the East Lyme trolley line, will be closed down by the Eastern Connecticut Power Co., which has been operating for some time past to transmit power to points west,

At present the \$0-cycle transmission line of the Eastern Connecticut Power company which has its plant at Mont-ville, ends in Waterford and the energy has been transformed at the Water-ford plant to 25 cycles which is the amount of energy supplied to the west-ern territory of the plant which extends to Madison. It is the plan of the company to change over to the 60-cycle transmission to supply the westirn ter-ritory and this will necessitate the discontinuance of the Waterford plant.

An official of the company stated on Wednesday that the change is being made in the interests of improving the service and bringing it up to a higher standard. The 25-cycle system is antiquated and it is intended to replace it with the higher cycle system.

In o attendants will be needed, inaxmuch as the plant will only have erdinary transformers and switches there.

The exact date of the discontinuance of the plant is not known. The intention is to make the change during the holiday season and it is expected that it will have been completed soon after the new year. The closing down of the plant means the new year, that there will be no attendants there.

At present three attendants are employ-ed at the plant, one for each of three eight-hour shifts, but with the change no attendants will be needed, inasmuch as the plant will only have ordinary transformers and switches there.
